

Disruptive and Innovative Thinking in the Digital Age

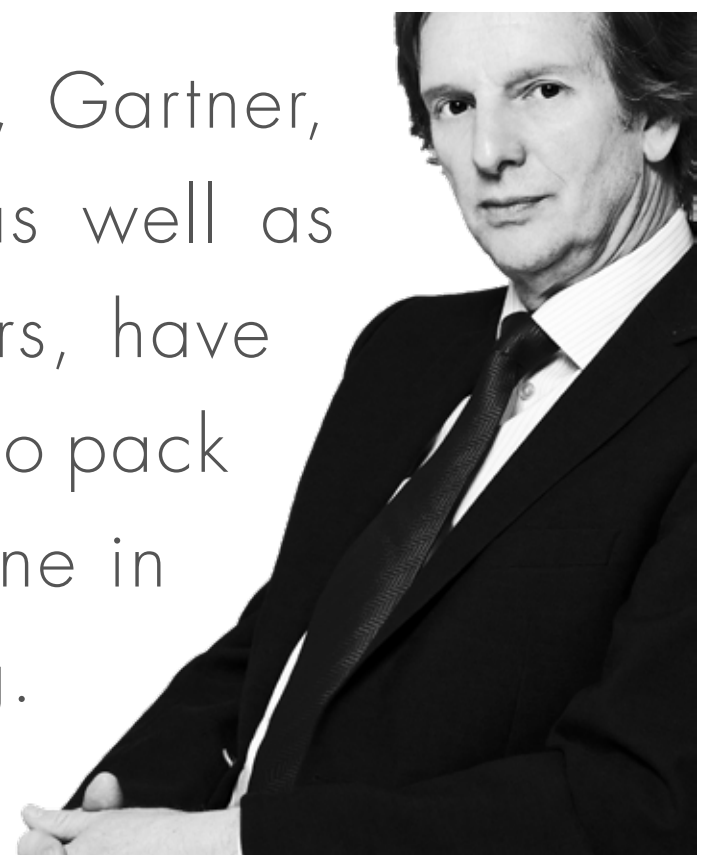

Inspiring Keynotes with Nigel Barlow

Digital Transformation and **Disruptive Innovation** are the words on everyone's lips. So what room is there for creativity and initiative when algorithms, Big Data and AI seem to trump all human endeavours?

Working at the interface between the digital and human worlds, Nigel Barlow explores with leaders around the globe how to develop the qualities of personal and organisational creativity, as we inevitably become digital citizens.

Technology companies like Apple, Gartner, Hewlett-Packard and Microsoft, as well as many others across industry sectors, have benefited from his insights on what to pack for the future - and how to stay sane in the gold rush to digitise everything.

'I would really like to thank you for your excellent work on Saturday. So far, I've received many, many comments on how great the session was. You really exceeded our best expectations.'

Here are some typical talks
Nigel Barlow has given:

The Mindset of a Disruptor

What does it take to transcend convention, upend assumptions and adopt a possibility mindset? This talk explores what, and how.

Garagista!

Innovation as Everybody's Business

Many of the world's great disruptors were birthed in a garage. How do you bring this attitude and practice to bear on your greatest innovative challenges?

Digicare- the Customer Experience in an On-line World

Retaining the human touch in digital times – and applying it to the on-line experience you provide for your users and customers

Millennial Mania - Managing the New Generation

There are over 80 million so-called 'millennials' in the USA alone. A generation with different values, expectations and attitudes towards work and technology. So how do we most effectively lead and market to this new cohort?

Future Curious

When the world is transforming and shaking beneath our feet, how do we find the time, space, and motivation to be curious about the new? Curiosity is the basis of creativity, so what are the tools to keep us thinking in fresh, and disruptive ways?
